The proposed project

Project title
Youth-Led Community Action and Skills Initiative

Implementation period
Proposed 6–12 month pilot, with final schedule agreed after eligibility, baseline and permissions are confirmed.

Location
South Africa, with the specific province/ municipality to be selected and confirmed with Chaval Foundation

Target beneficiaries
Proposed: young people in a selected South African community, with wider community residents benefiting from youth-led development activities; participant age range, cohort size and inclusion criteria to be agreed with Chaval.

Proposed outputs and targets

The following are proposed planning targets, not completed results. Final targets should be agreed with the company after baseline assessment, budget confirmation and any required stakeholder permissions.

- Proposed: recruit and train 40 young participants in community needs assessment, project planning, communication and responsible civic participation.
- Proposed: support 4 youth-designed and youth-led community-development activities in the selected locality.
- Proposed: deliver 8 practical workshops and mentorship sessions, with attendance and completion records.
- Proposed: engage at least 200 wider community beneficiaries through the activities, subject to baseline confirmation.
- Proposed: provide a close-out report with participation data, activity evidence, lessons learned and a sustainability plan.

Expected outcomes

- Improved community participation and practical public-benefit action in the selected location.
- Improved access to relevant learning, environmental, inclusion, humanitarian or youth-development support, depending on the project design.
- Documented implementation evidence, beneficiary participation and lessons for continuation or scale-up.
- Clear accountability through expenditure records, activity updates, monitoring information and a close-out report.

Why this matters

The proposed intervention responds to a community-development need through the sequence **community need → practical intervention → measurable result**. The final baseline will verify the specific need, beneficiary profile, site conditions, permissions and appropriate indicators before implementation.

ASCO will avoid overstating the problem or claiming results in advance. Where waste, participation, learning, environmental condition, referrals or other outputs are measurable, ASCO will use simple evidence tools such as attendance registers, baseline/endline checks, activity logs, photographs with consent, beneficiary feedback and expenditure records.

> **Evidence discipline:** All numbers in this proposal are either company-reported context from official sources or clearly labelled ASCO planning targets. No completed result, partnership or funding commitment is claimed.

Important conditions and open questions

- The official source does not state that Chaval Foundation has approved or committed to fund ASCO, nor does it confirm any existing ASCO partnership.
- No formal external-organisation eligibility rules, proposal template, application deadline, due-diligence checklist, reporting requirements or minimum/maximum grant size were found on the official page.
- No specific province, municipality or community is identified; 'across South Africa' is the only published geographic scope.
- The page does not explicitly state that civic participation, governance or advocacy projects are eligible; alignment with youth skills/community development should therefore be presented as a proposed fit, not a confirmed funding match.
- Section 18A approved | Effective 9 October 2026

These cautions are included to prevent overstatement. They should be resolved with the company before ASCO treats the proposal as eligible or finalises a submission budget.
